

- CREDENTIALS HANDLING:
- Acme Wallet  $\leftrightarrow$  app/website
- Acme Wallet  $\leftrightarrow$  Acme User

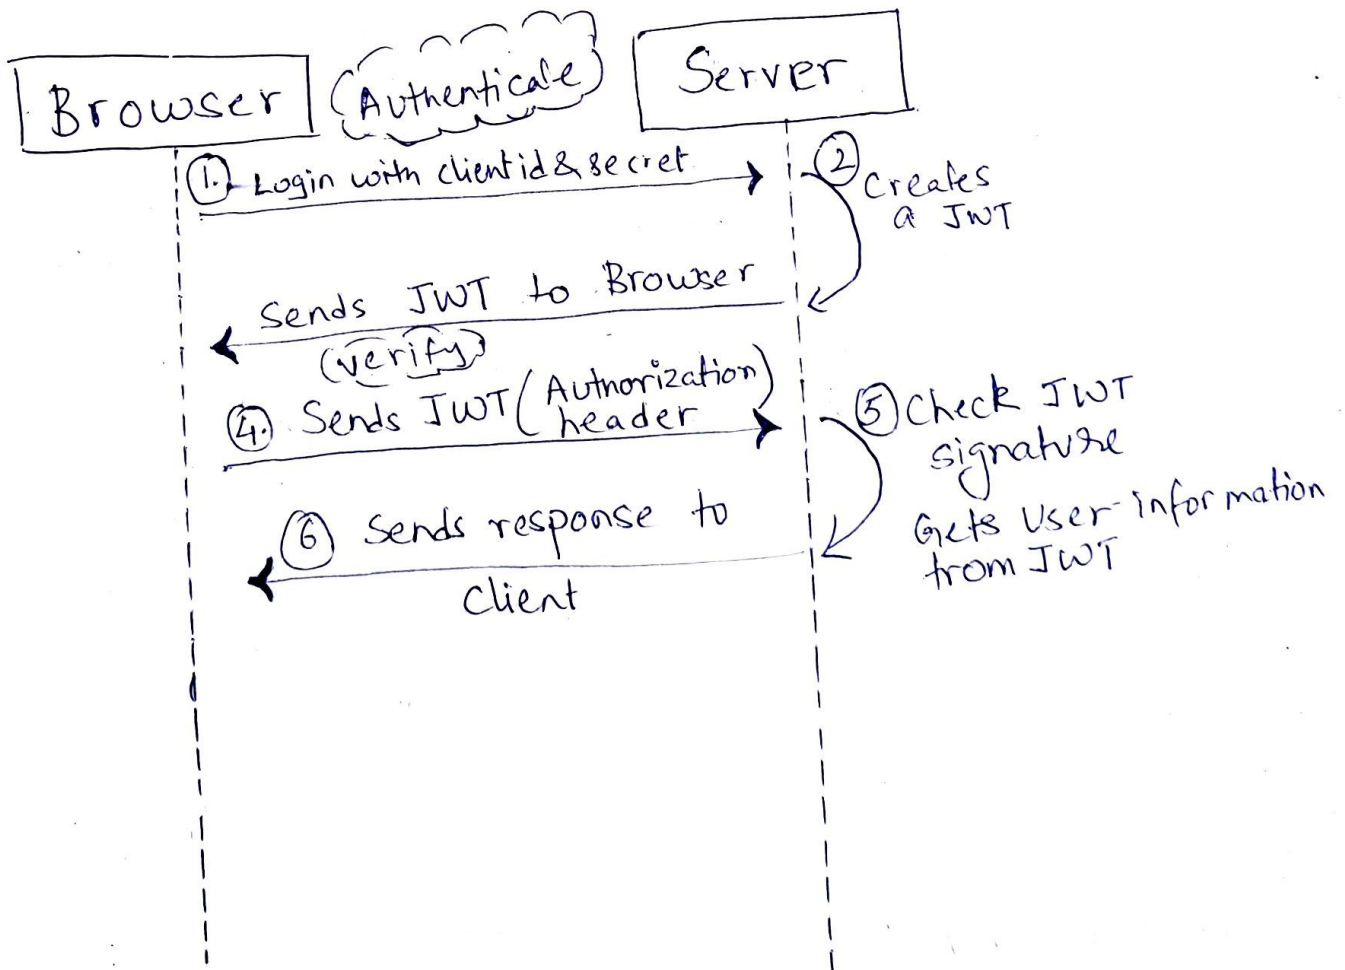

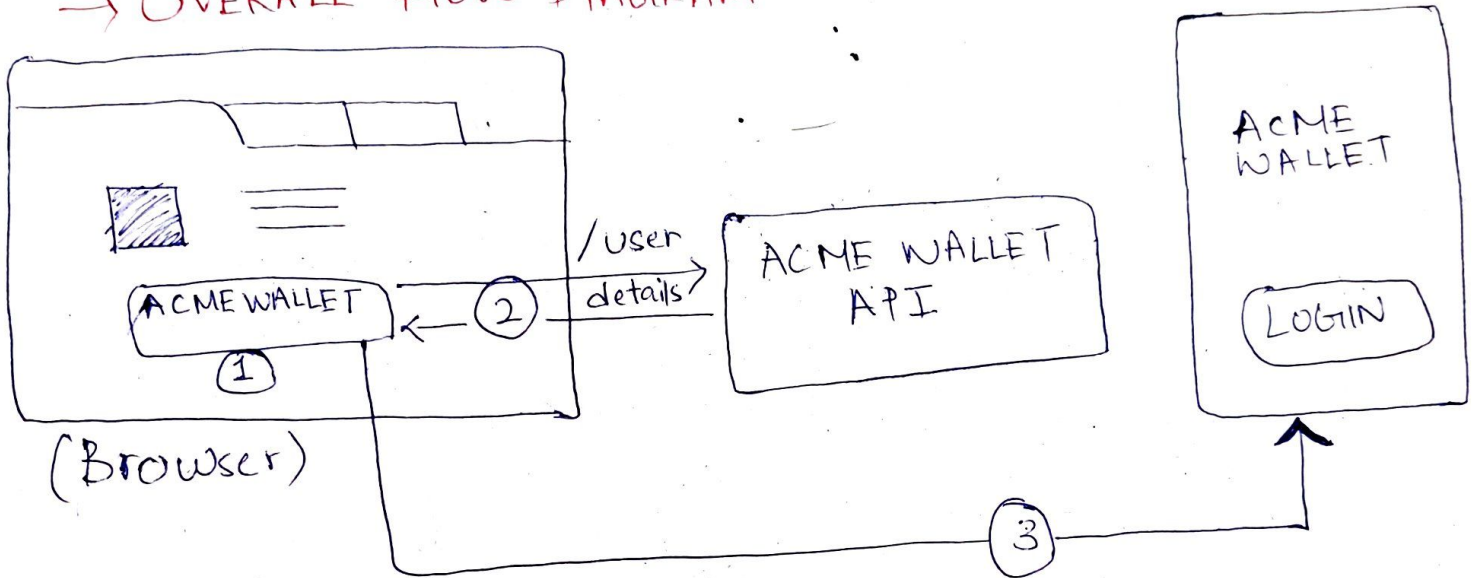

→ Client Credentials Grant Flow (OAuth)

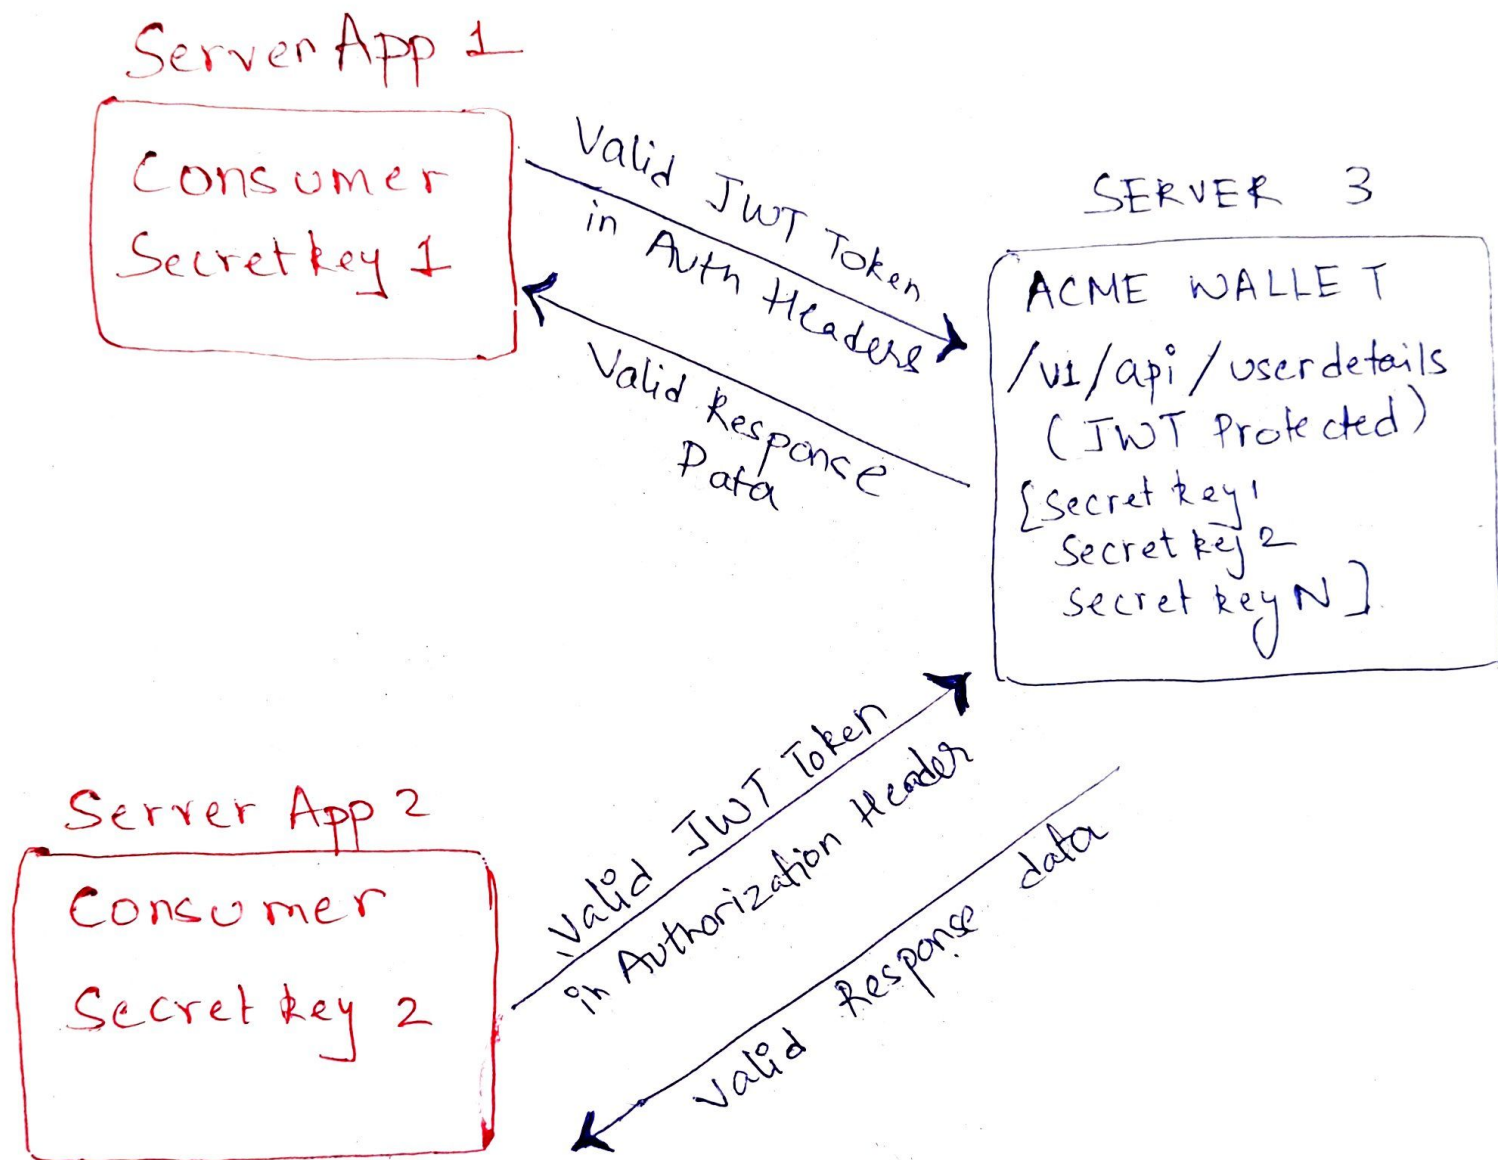

# Authorization and Authentication

## CLIENT-SERVER

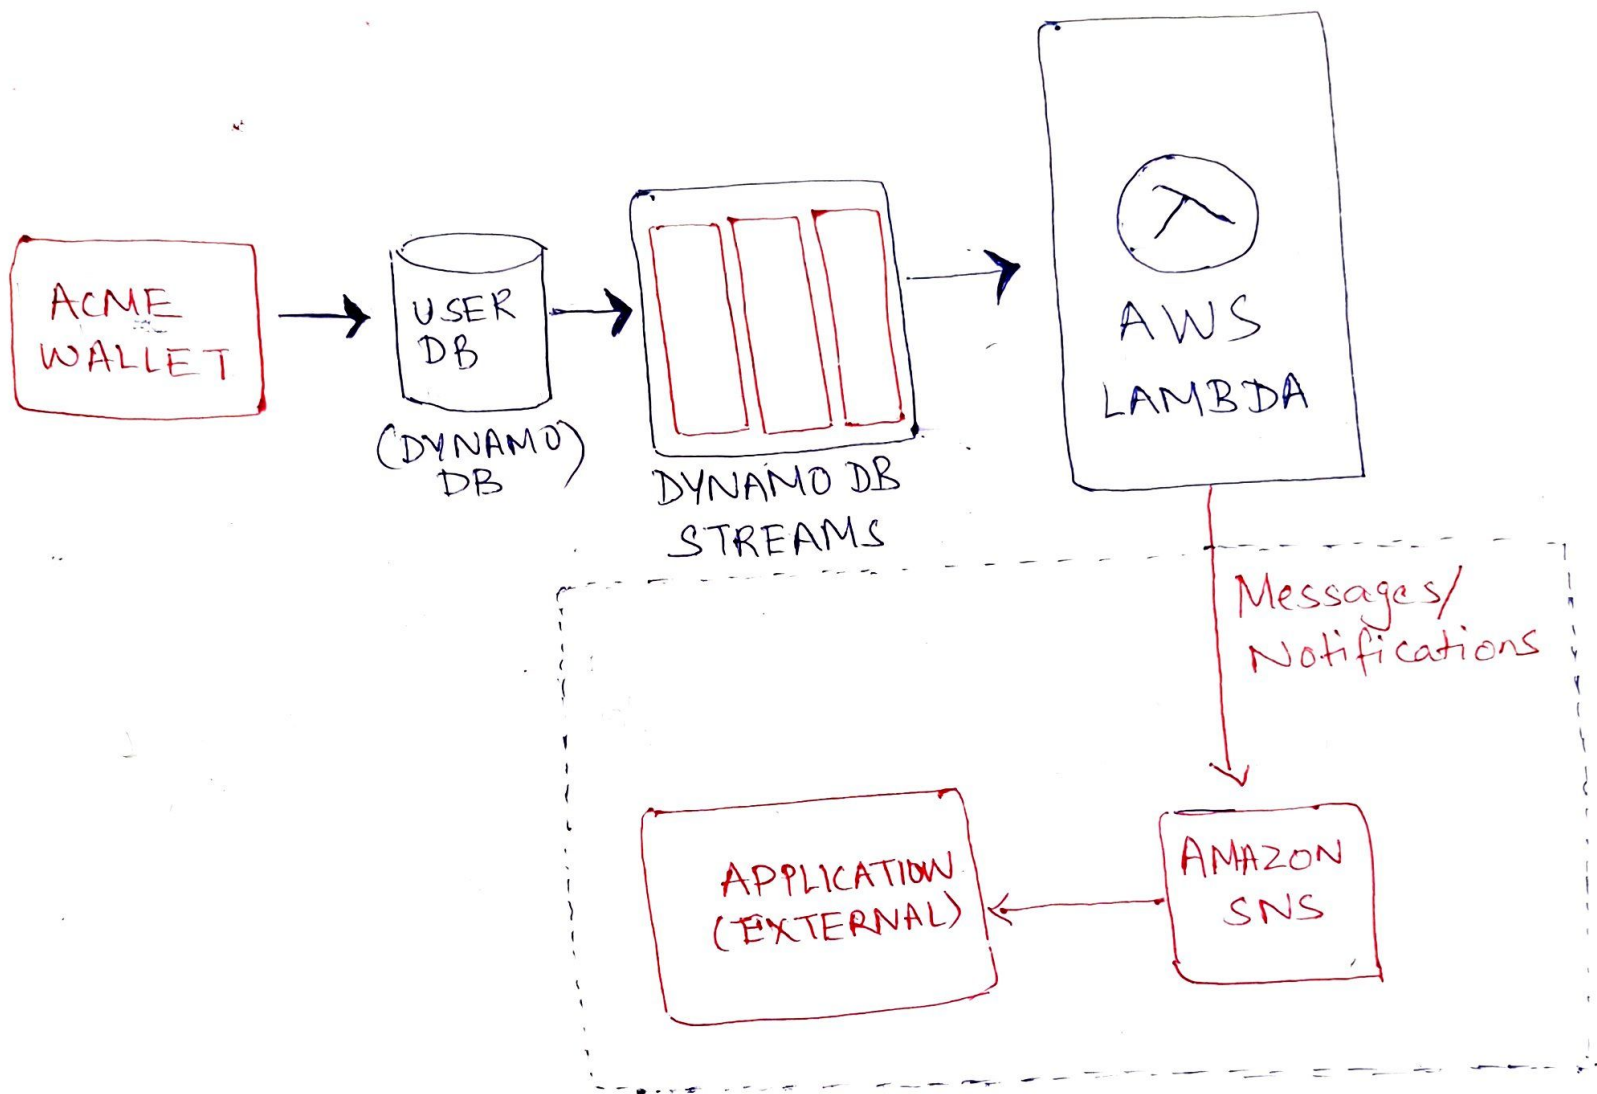

### → OVERALL FLOW DIAGRAM

## ② SERVER - SERVER AUTHENTICATION

- ① Asynchronously publish users' balance changes to apps where the user is logged in.

- ① The Lambda ~~polls~~ polls DynamoDB stream and when it detects a new record, it invokes your Lambda function.
